

Case Study for Kwantify HRMS

What they do?

Seven Seas Computers delivers technology solutions and services in business software, data networking, business continuity and data center, enterprise and high availability, voice solutions, information security, intelligent building management systems (IBMS), smart homes, value added IT services, corporate procurement and consulting.

Pre Kwantify-HRMS Operations:

Seven seas computers was managing its HR related operations on excel sheets and documented files. This system was labor intensive and human error prone. There were instances when while doing the system studies, our business analysis team found gaps / repeats in the data files. The processes involved were redundant and included storing data in multiple excels and hard copy files. This led to implementation of end to end features of Kwantify-HRMS.

Pain Points:

The process what client was following, had the following problems:

<ul style="list-style-type: none"> • Effort duplication • Manual processes • Workflow constrained • Large amount of paper files 	<ul style="list-style-type: none"> • Poor data quality • Human error • Invalid or useless data • Improper reports 	<ul style="list-style-type: none"> • Data loss • Delay in reports • Poor analysis • Poor data accuracy
